

# UNIT 13: Which Raccoon best represents how you are feeling at the END of today's Group Chat?

Image Credit: [nochatrashposts](#)

Image Description: A grid of 9 different photos of raccoons.

Raccoon Image 1: A raccoon has its mouth wide open as if ready to attack. Its jaw is facing the camera and its eyes are obscured.

Raccoon Image 2: A raccoon has human glasses on as it looks happily into the camera.

Raccoon Image 3: A raccoon is sticking its tongue out and looking at something in front of it.

Raccoon Image 4: A raccoon is looking ahead straight-faced.

Raccoon Image 5: A raccoon looks up ahead, looking longingly as if it is trying to get a treat or food. It is leaning its face against something which is pulling his lips slightly open to expose one tooth, and its ears are angled to the side. The camera's angle emphasizes the raccoon's nose.

Raccoon Image 6: The photo's angle makes the raccoon's nose appear abnormally large compared to its eyes, and its ears are pulled back, giving it a comedic look. The raccoon looks contently ahead with a slight smile.

Raccoon Image 7: A raccoon looks fed up, tired, or disappointed as it stares ahead.

Raccoon Image 8: A raccoon looks surprised with its mouth open. Its face appears almost dog-like.

Raccoon Image 9: A raccoon looks happily into the distance. It looks as though it is anticipating something positive.
